

We Make Energy Efficiency Easy

Ekotrope for Raters and Providers

Ekotrope is the premier provider of HERS rating software, serving over 75% of the market with our modern, intuitive interface that goes beyond industry standards. With over 200,000 ratings processed in 2020, Ekotrope RATER delivers ratings that are calculated with precision, at a pace that supports your business. Ekotrope makes otherwise tedious and time-consuming tasks faster and more efficient, delivering results with just a few clicks.

In addition to HERS ratings and utility program submissions, Ekotrope has created a suite of tools designed to suit all of your energy modeling needs. Our products are constantly evolving and are informed by the needs of our clients, resulting in innovative solutions that save you time and money.

Our Products and Services:

HERS Ratings

Our distinct capabilities like automated QA/QC, real-time modeling feedback, integrated Provider/Rater file sharing, and organization-wide library management system take the guesswork out of energy modeling.

Code Compliance and Support for Certification Programs

Ekotrope RATER offers code compliance reporting and supports building standards for Energy Star, DOE, EPA, ASHRAE, LEED, IECC, and NGBS, in addition to many others

45L Processing

Ekotrope can check your ratings for 45L Tax Credit compliance and deliver compliance PDF certificates for all passing homes.

Scenario Modeling

Scenario Modeling is a premium add-on to Ekotrope RATER, enabling raters to quickly select many building design changes and determine their impact on hundreds of energy models at once, delivering accurate results quickly. In just a few clicks, raters can provide their builder clients with the most accurate and high quality information in order to make informed design decisions.

HERS Rating API

Ekotrope provides an application programming interface (API) to enable 3rd party IT systems to integrate directly with Ekotrope with no need for human interaction. This allows CRM systems like Salesforce or even custom-built scripts and project management software to pull and push data to and from Ekotrope software automatically.

The Ekotrope Difference

- ✓ Best in class support
- ✓ Automated QA/QC
- ✓ Embedded incentive calculations and 1-click submissions
- ✓ Support for a variety of state and local programs
- ✓ Live updates with version control
- ✓ Accessible on any device, anywhere
- ✓ Singular organizational component library for easy and consistent library management

“Without Ekotrope, our company would never be able to do the volume of ratings that we do now. We really appreciate both the product and the team, they are awesome to work with!”
